

Workfront + Fusion minimize “work about work”

Wipe out redundancy, rework, and repetition with an integrated and automated work management system. Let WNDYR's Adobe-certified Workfront Consultants and Fusion Engineers put their process design and technical expertise into a solution that's seamlessly connected, built for scale, and uniquely your own.

With Adobe Fusion Integration Design and Implementation Services from WNDYR, you'll be able to:

- Automate workflow processes between Adobe Workfront and the suite of critical software applications used across your business
- Sync relevant operational, financial, utilization and project-based data across platforms in real-time (or very close to it)
- Augment the capabilities of native Adobe Workfront integrations
- Accelerate workflow inside of Adobe Workfront through enhanced process automation

Which, in turn, will allow you to:

- ✓ Break down operational silos
- ✓ Reduce or eliminate process redundancies caused by swivel-chair work activity
- ✓ Remove critical blind spots
- ✓ Accelerate decision-making
- ✓ Mitigate risk proactively
- ✓ Enhance the value of these automations to address your unique needs
- ✓ All but eliminate routine, repetitive administrative tasks and fully focus your human capital on strategy, innovation, and results

Our integration solution experience spans a wide range of platform verticals and use cases.

- Brandfolder
- MediaValet

Finance & Accounting / ERP

- Oracle NetSuite
- Sage Intacct
- Microsoft Dynamics
- Quickbooks
- Coupa
- Xero

Client Success Stories: Using Fusion to integrate and automate platforms

Deerfield:

This healthcare marketing agency licensed Workfront and NetSuite at the same time, but they weren't connected. Through thoughtful integration designed by WNDYR, Workfront and NetSuite now pass realtime information back and forth including hours and expenses for each job within Workfront, client information, updates and job status. This ensured that client billing - whether by retainer or by hour - was managed correctly and accurately.

Emerson - Creative Marketing:

The client wanted an easier route to managing campaign requests that included many different deliverables all supporting the same campaign. WNDYR delivered a Fusion automation that used custom dynamic forms that only needed to be filled out once requesting those supporting assets. Fusion then automated the creation of a new Program - in the right Portfolio and created individual projects containing all the supporting information (ie Creative Briefs etc) using the correct template and task assignments to provide time savings of hundreds of hours per year.

For scoping and pricing, contact:

Chris Yahnke
Partner Sales Manager
chris@wndyr.com

Pricing subject to scale based on factors such as the number and complexity of use cases to be enabled and data mapping requirements. A brief pre-sales scoping exercise will allow us to properly size your engagement needs and provide a customized estimate for services.
