

 **W N D Y R**®

From time to time, we all need a little R&R...

The WNDYR accelerated [Review and Recommend](#) program

Delivers your foundational roadmap to simplify, stabilize and scale your use of Workfront – delivered in as little as two weeks.

wndyr.com

An Ideal Starting Point When:

“

I inherited this instance and have no idea why it was set up this way, or how to 'fix' it

“

Leadership needs better visibility into the overall progress of work and resource utilization

“

Users complain that important info is hard to find (e.g. too much / not enough / disorganized)

“

Every team is set up differently and its very disjointed when we need to collaborate

“

We know Workfront is a powerful platform but don't feel like we're tapping into its full potential

Program At-A-Glance:

Our process kicks off with a 90-minute discovery session where you'll give us a tour of your existing Workfront instance, and share how it is currently used, by whom, and what the most common or pressing pain points are.

Our expert Workfront consultants will then do a thorough independent review of your instance from tip to tail, and provide detailed findings, recommendations and rationales organized into key topic areas:

-  Portfolio & Program Architecture
-  Process Management: Queue Setup and Project Templates
-  Resource Management
-  Financials
-  User Architecture, Management and Access
-  Persona-based User Experience Design
-  Reports and Dashboards
-  General System Settings

Generally within two weeks, we'll present our key findings and recommendations to you in a 60-minute readout session, and deliver **a fully-prioritized action plan** in the form of a live project inside your Workfront instance that you can immediately begin working against.

Price: \$4,800

WNDYR will also credit the full value of the Review and Recommend to any customer who purchases a professional optimization services engagement valued at or above \$40,000*

Review and Recommend is intended as a foundational diagnostic to assess current use of the core functionality available within Workfront. It is not intended to provide detailed analysis or optimization recommendations concerning specific work processes, automations or integrations. *To receive the Review and Recommend credit, optimization engagement must be signed within 60 days after delivery of the R&R action plan.
